

## List of Contents

### NUMBER 1

<b>Zvi Drezner and George O. Wesolowsky</b>	1	Allocation of demand when cost is demand-dependent
<b>Andreas Frink and Stefan Voß</b>	17	Applications of modern heuristic search methods to pattern sequencing problems
<b>A. Volgenant and E. Teerhuis</b>	35	Improved heuristics for the $n$ -job single-machine weighted tardiness problem
<b>Dirk Biskup and T. C. Edwin Cheng</b>	45	Multiple-machine scheduling with earliness, tardiness and completion time penalties
<b>Soung-Hie Kim, Choong-Gyoo Park and Kyung-Sam Park</b>	59	An application of data envelopment analysis in telephone offices evaluation with partial data
<b>Bin Liu and Jinhua Cao</b>	73	Analysis of a production-inventory system with machine breakdowns and shutdowns

### NUMBER 2

<b>Sabine Wittevrongel and Herwig Bruneel</b>	93	Discrete-time queues with correlated arrivals and constant service times
<b>Ching-Fang Liaw</b>	109	A tabu search algorithm for the open shop scheduling problem
<b>Nagraj Balakrishnan, John J. Kanet and 'Sri' V. Sridharan</b>	127	Early/tardy scheduling with sequence dependent setups on uniform parallel machines
<b>Richard L. Daniels, Stella Y. Hua and Scott Webster</b>	143	Heuristics for parallel-machine flexible-resource scheduling problems with unspecified job assignment
<b>V.S. Gordon and V.A. Strusevich</b>	157	Earliness penalties on a single machine subject to precedence constraints: SLK due date assignment
<b>G.H. Chan, Z.H. Xia and E.U. Choo</b>	179	The critical cut-off value approach for dynamic lot sizing problems with time varying cost parameters

### NUMBER 3

Dennis Ridley	189	Optimal antithetic weights for lognormal time series forecasting
Haïscam Abdallah, Raymond Marie and Bruno Sericola	211	Point and expected interval availability analysis with stationarity detection
Vinicius A. Armentano and Débora P. Ronconi	219	Tabu search for total tardiness minimization in flowshop scheduling problems
H. M. Wee and W. T. Wang	237	A variable production scheduling policy for deteriorating items with time-varying demand
Gulay Barbarosoglu and Demet Ozgur	255	A tabu search algorithm for the vehicle routing problem
Diptesh Ghosh and Nilotpal Chakravarti	271	A competitive local search heuristic for the subset sum problem
Douglas M. Kline, Abraham Mehrez and Geoffrey Steinberg	281	Information availability vs. solution space size in a knowledge acquisition position

### NUMBER 4

#### THE TRAVELING SALESMAN PROBLEM

Samuel J. Raff	293	Preface
A. Punnen	295	Editorial
Y.P. Aneja and H. Kamoun	297	Scheduling of parts and robot activities in a two machine robotic cell
Gregory Gutin	313	Exponential neighbourhood local search for the traveling salesman problem
Gregory Gutin and Anders Yeo	321	Small diameter neighbourhood graphs for the traveling salesman problem: at most four moves from tour to tour
S.N. Kabadi and Md. Fazle Baki	329	Gilmore-Gomory type traveling salesman problems
Md. Fazle Baki and Santosh N. Kabadi	353	Pyramidal traveling salesman problem

<b>Leyuan Shi, Sigurdur Ólafsson and Ning Sun</b>	<b>371</b>	New parallel randomized algorithms for the traveling salesman problem
<b>Samerkae Somhom, Abdolhamid Modares and Takao Enkawa</b>	<b>395</b>	Competition-based neural network for the multiple travelling salesman problem with minmax objective
<b>Edo S. van der Poort, Marek Libura, Gerard Sierksma and Jack A.A. van der Veen</b>	<b>409</b>	Solving the <i>k</i> -best traveling salesman problem
<b>Steven E. Butt and David M. Ryan</b>	<b>427</b>	An optimal solution procedure for the multiple tour maximum collection problem using column generation

#### NUMBER 5

<b>Paul Mangiameli and David West</b>	<b>443</b>	An improved neural classification network for the two-group problem
<b>Chu-Fu Wang, Bo-Rong Lai and Rong-Hong Jan</b>	<b>461</b>	Optimum multicast of multimedia streams
<b>James M. Varanelli and James P. Cohoon</b>	<b>481</b>	A fast method for generalized starting temperature determination in homogeneous two-stage simulated annealing systems
<b>Jae-Dong Hong and Jack C. Hayya</b>	<b>505</b>	On integrated production-replenishment policies in single-stage manufacturing
<b>Oded Berman and U. Dinesh Kumar</b>	<b>525</b>	Optimization models for complex recovery block schemes

#### NUMBER 6

<b>Hui-Ming Wee and Sh-Tyan Law</b>	<b>545</b>	Economic production lot size for deteriorating items taking account of the time-value of money
<b>H.W. Lee, S.H. Lee, S.H. Yoon, B.Y. Ahn and N.I. Park</b>	<b>559</b>	A recursive method for Bernoulli arrival queues and its application to partial buffer sharing in ATM
<b>Faruk Güder and James L. Zydiak</b>	<b>583</b>	Ordering policies for multi-item inventory systems subject to multiple resource constraints

- |  |     |   |
|--|-----|---|
| Shaw-Ping Lan, Peter Chu,<br>Kun-Jen Chung,<br>Wun-Jung Wan and Ricky Lo | 599 | A simple method to locate the optimal solution of the inventory model with variable lead time |
| Tamie L. Veith, John E. Kobza<br>and C. Patrick Koelling                 | 607 | Netsim: Java <sup>TM</sup> -based simulation for the World Wide Web                           |
| Ralf Östermark   | 623 | Solving a nonlinear non-convex trim loss problem with a genetic hybrid algorithm              |
| Noel (Kweku-Muata) Bryson<br>and Anito Joseph                            | 637 | Generating consensus priority point vectors: a logarithmic goal programming approach          |

#### NUMBER 7

- |  |     |  |
|--|-----|--|
| Ji-Hui Zhang and<br>Xin-He Xu                                    | 645 | An efficient evolutionary programming algorithm  |
| Tai-Yue Wang and<br>Kuei-Bin Wu                                  | 665 | A parameter set design procedure for the simulated annealing algorithm under the computational time constraint |
| Ching-Fang Liaw  | 679 | A branch-and-bound algorithm for the single machine earliness and tardiness scheduling problem                 |
| Bertrand M.T. Lin  | 695 | The strong NP-hardness of two-stage flowshop scheduling with a common second-stage machine                     |
| Michel Gendreau,<br>Gilbert Laporte and<br>Daniele Vigo          | 699 | Heuristics for the traveling salesman problem with pickup and delivery   |
| T.C. Edwin Cheng,<br>Guoqing Wang and<br>Chelliah Sriskandarajah | 715 | One-operator-two-machine flowshop scheduling with setup and dismounting times                                  |
| Waldemar Czuchra   | 731 | Optimizing budget spendings for software implementation and testing  |

#### NUMBER 8

- |                                    |     |  |
|------------------------------------|-----|--|
| T.C.E. Cheng and Q. Ding           | 749 | The time dependent machine makespan problem is strongly NP-complete                            |
| Soung Hie Kim and<br>Chang Hee Han | 755 | An interactive procedure for multi-attribute group decision making with incomplete information |

Funda Sivrikaya-Şerifoğlu and Gündüz Ulusoy	773	Parallel machine scheduling with earliness and tardiness penalties
J.M. Coutinho-Rodrigues, J.C.N. Clímaco and J.R. Current	789	An interactive bi-objective shortest path approach: searching for unsupported non- dominated solutions
Shouhong Wang	799	Nonlinear regression: a hybrid model
W.L. Pearn and J.B. Chou	819	Improved solutions for the Chinese postman problem on mixed networks
A. Kimms	829	A genetic algorithm for multi-level, multi- machine lot sizing and scheduling

#### NUMBER 9

Emanuel Melachrinoudis and Frank GuangSheng Zhang	849	An $O(mn)$ algorithm for the 1-maximin problem on a network
Peter M. Vanden Bosch, Dennis C. Dietz and Edward A. Pohl	871	Choosing the best approach to matrix exponenti- ation
Toshitsugu Otake, K. Jo Min and Cheng-Kang Chen	883	Inventory and investment in setup operations under return on investment maximization
Won Jun Lee and Kun Chang Lee	901	PROMISE: a distributed DSS approach to coordinating production and marketing deci- sions
Erik Rolland, Ali Amiri and Reza Barkhi	921	Queueing delay guarantees in bandwidth pack- ing

#### NUMBERS 10-11

#### AGGREGATION AND DISAGGREGATION IN OPERATIONS RESEARCH

Samuel J. Raff	937	Preface
David F. Rogers	939	Foreword
<i>Mathematical Programming &amp; Networks</i>		
H. Edwin Romeijn and Robert L. Smith	941	Parallel algorithms for solving aggregated shortest-path problems

<b>Kurt Jørnsten, Rainer Leisten and Sverre Storøy</b>	955	Convergence aspects of adaptive clustering in variable aggregation
<b>Igor S. Litvinchev and Socorro Rangel</b>	967	Localization of the optimal solution and a poste- riori bounds for aggregation
<b>Chiun-Ming Liu</b>	989	Clustering techniques for stock location and order-picking in a distribution center
<b>Susan K. Norman, David F. Rogers and Martin S. Levy</b>	1003	Error bound comparisons for aggregation/dis- aggregation techniques applied to the transpor- tation problem
<i>Production Planning &amp; Scheduling</i>		
<b>Jishnu Hazra, Paul J. Schweitzer and Abraham Seidmann</b>	1015	Analyzing closed Kanban-controlled assembly systems by iterative aggregation-disaggre- gation
<b>Rajesh Tyagi and Chandrasekhar Das</b>	1041	Grouping customers for better allocation of resources to serve correlated demands
<b>Larry Weinstein and Chen-Hua Chung</b>	1059	Integrating maintenance and production deci- sions in a hierarchical production planning environment
<i>Location Analysis</i>		
<b>Erhan Erkut and Burçin Bozkaya</b>	1075	Analysis of aggregation errors for the $p$ -median problem
<b>Robert L. Bowerman, Paul H. Calamai and G. Brent Hall</b>	1097	The demand partitioning method for reducing aggregation errors in $p$ -median problems
<b>M. Brenda Rayco, Richard L. Francis and Arie Tamir</b>	1113	A $p$ -center grid-positioning aggregation pro- cedure
<i>Markov Chains</i>		
<b>Moshe Haviv</b>	1125	On censored Markov chains, best augmentations and aggregation/disaggregation procedures
<i>Forecasting</i>		
<b>Gene Fliedner</b>	1133	An investigation of aggregate variable time series forecast strategies with specific subaggre- gate time series statistical correlation
	1151	List of Referees

#### NUMBER 12

- |  |             |  |
|--|-------------|--|
| <b>Michel Gendreau,<br/>Gilbert Laporte,<br/>Christophe Musaraganyi<br/>and Éric D. Taillard</b> | <b>1153</b> | A tabu search heuristic for the heterogeneous fleet vehicle routing problem                          |
| <b>Ching-Chir Shyur, Ta-Chien Lu<br/>and Ue-Pyng Wen</b>   | <b>1175</b> | Applying tabu search to spare capacity planning for network restoration                              |
| <b>Ruben Kirkeby Martinson<br/>and Jørgen Tind</b>   | <b>1195</b> | An interior point method in Dantzig-Wolfe decomposition  |
| <b>Manuel Laguna, Rafael Marti<br/>and Vicente Campos</b>  | <b>1217</b> | Intensification and diversification with elite tabu search solutions for the linear ordering problem |
| <b>Gary R. Reeves and<br/>Randall C. Reid</b>  | <b>1231</b> | A military reserve manpower planning model   |

#### NUMBER 13

- |  |             |   |
|--|-------------|---|
| <b>Edward M. Condon,<br/>Bruce L. Golden and<br/>Edward A. Wasil</b> | <b>1243</b> | Predicting the success of nations at the Summer Olympics using neural networks                                      |
| <b>Ayşe Kavusturucu and<br/>Surendra M. Gupta</b>                    | <b>1267</b> | Expansion method for the throughput analysis of open finite manufacturing/queueing networks with N-policy           |
| <b>Wei-Chang Yeh</b>   | <b>1293</b> | A new branch-and-bound approach for the $n/2/\text{flowshop}/\alpha F + \beta C_{\max}$ flowshop scheduling problem |
| <b>Gary R. Reeves and<br/>Kenneth R. MacLeod</b>                     | <b>1311</b> | Some experiments in Tchebycheff-based approaches for interactive multiple objective decision making                 |
| <b>David J. Robb and<br/>Dan Trietsch</b>                            | <b>1323</b> | Maximizing the number of mixed packages subject to variety constraints  |

#### NUMBER 14

##### LOCATION SCIENCE

- |   |             |   |
|---|-------------|---|
| <b>Zvi Drezner and George O.<br/>Wesolowsky</b> | <b>1335</b> | Allocation of discrete demand with changing costs |
|---|-------------|---|

<b>Stefano Benati</b>	1351	The maximum capture problem with heterogeneous customers
<b>Maureen Kilkenney and Jacques-François Thisse</b>	1369	Economics of location: A selective survey
<b>Igor Averbakh and Oded Berman</b>	1395	Algorithms for path medi-centers of a tree
<b>Mihiro Sasaki, Atsuo Suzuki and Zvi Drezner</b>	1411	On the selection of hub airports for an airline hub-and-spoke system
<b>Mamnoon Jamil, Alok Baveja and Rajan Batta</b>	1423	The stochastic queue center problem
